# Gukesh is youngest world chess champ

The 18-year-old from Chennai beats Ding Liren of China in the final game; breaks the record held by Russian Garry Kasparov for nearly 4 decades

**P.K. Ajith Kumar**  
SINGAPORE

**H**istory was made in the small island of Sentosa here on Thursday, as D. Gukesh became the youngest world chess champion after defeating Ding Liren of China in the final game of their match. The 18-year-old from Chennai broke the record held by the Russian Garry Kasparov for nearly four decades.

With his victory against the defending champion, which came after 58 moves, Gukesh took his points tally to 7.5. That was the requirement for a player to win the World title. The game was heading towards a draw in fact, until Ding made a fatal error on the 55th move with his

back for the Chinese Grandmaster after that.

This was the first-ever World championship match contested by two Asian players.

Gukesh is only the third Asian to win the World championship. Viswanath-

mentor for Gukesh, was the first, and Ding the second.

### Union Cabinet approves Bills on simultaneous polls

**The Hindu Bureau**  
NEW DELHI

The Union Cabinet on Thursday approved two Bills related to the implementation of simultaneous elections to the Lok Sabha and the Assemblies, paving the way to introduce the draft legislation in Parliament in the ongoing Winter Session.

One of the Bills is to amend the Constitution to implement simultaneous elections, while the other is to amend provisions in laws dealing with Union Territories that have Legislative Assemblies to align their terms with other Legislative Assemblies.

The development evoked sharp responses from the Chief Ministers of Tamil Nadu and West Bengal, who called the draft Bills “an attack on democracy and federalism”.

No official announcement has been made so far, but sources said the Bills would be referred to a joint

**Move paves way to introduce draft legislation in the House. No official announcement has been made so far**

committee of Parliament, once they are introduced in the House.

For now, the Cabinet has given its approval to the draft legislation for simultaneous polls to the Lok Sabha and Legislative Assemblies. The Constitution amendment Bill to hold simultaneous polls will not require to be ratified by at least 50% of the States, the sources added. A high-level committee, headed by former President Ram Nath Kovind, had also recommended holding simultaneous polls to municipalities and panchayats, but the Cabinet has decided not to get into the issue of synchronising local body polls. This would have not only required a Constitution

amendment, to insert a new Article 324A, but also ratification by half the Assemblies.

Taking to the social media platform X, Tamil Nadu Chief Minister M.K. Stalin said, “This impractical and anti-democratic move will erase regional voices, erode federalism, and disrupt governance. Rise up #INDIA! Let us resist this attack on Indian democracy with all our strength!”

In a separate X post, West Bengal Chief Minister Mamata Banerjee called it “an authoritarian imposition designed to undermine India’s democracy and federal structure”.

“Our MPs will oppose this draconian legislation tooth and nail in Parliament. Bengal will NEVER bow to Delhi’s dictatorial whims. This fight is about saving India’s democracy from the clutches of autocracy!” she added.

**CONTINUED ON**  
» PAGE 16

- Union Cabinet approved two Bills for simultaneous elections to the Lok Sabha and State Assemblies. One Bill amends the Constitution; the other aligns Union Territories' Legislative Assemblies with other Assemblies.
- Prime Minister Narendra Modi advocates simultaneous elections to reduce poll-related expenditure and minimize governance disruption due to the model code of conduct.

#### Do you know ?

During the first four general election cycles in 1952, 1957, 1962 and 1967, the elections to the Lok Sabha and State legislative assemblies were held simultaneously. However, due to the subsequent premature dissolution of the Lok Sabha on seven occasions and the premature dissolution of legislative assemblies on various occasions, the elections to the Lok Sabha and various State assemblies are held at different times

The idea of simultaneous elections has been mooted in the past by the Election Commission of India (1982) and the Law Commission (1999).

### Beijing's war against air pollution

Beijing in 2015 had pollution levels similar to those in Delhi today. However, through coordinated effort over several years, Beijing reduced its pollution by one-third between 2013 and 2017; by learning from Beijing's approach, Delhi can implement effective strategies to tackle its air pollution problem

#### EXPLAINER

Johit Azad  
houvik Chakraborty

Beijing, with a yearly average air quality index (AQI) of 144, was as polluted in 2015 as Delhi is today (Delhi's average is 155 for O24). But in the interim, Beijing has managed to cut its pollution level by one-third with the most significant fall coming between 2013 and 2017 (Chart 1). To be sure, Beijing's pollution control programme dates back to 1998 which laid the foundation for this aggressive last phase of the programme, which was termed a "war against air pollution".

#### Why discuss Beijing in the context of Delhi?

Beijing is the capital of an emerging economy, as is Delhi. So, if Beijing could manage what it did at its stage of development, Delhi could and needs to, as well.

There are many similarities between Beijing in 2013 and Delhi today. Chart 2 compares the sources of pollution for the two cities.

For Delhi, we have used the winter months' data because that is the most updated emission inventory available. Moreover, much like Beijing, the regional

#### Turning the tide on pollution

Beijing's battle against air pollution provides a useful framework for Delhi. With improved transportation, stricter regulations, and regional collaboration, Delhi can follow a similar path to cleaner air

Chart 4: Measure-specific fall in pollutants in Beijing

Contribution of each measure in fall of air pollutants between 2013-17 (in %)

Chart 5: Financial investment to control

#### THE GIST

Beijing's approach to air pollution involved a long-term coordinated effort with a focus on regional cooperation and comprehensive policies across multiple sectors.

Key measures included improving transportation infrastructure, retrofitting vehicles, scrapping old vehicles, and enhancing industrial regulations.

Delhi can adopt similar strategies, focusing on integrated transport systems, regional collaboration, and stricter emission controls to combat its pollution crisis.

- Beijing's air quality was similar to Delhi's current levels but has managed to cut pollution by one-third since 2015.
- Beijing's Measures: Pollution Sources: Energy structures (coal combustion), transportation, and industrial activities.
- Steps Taken: Ultra-low emission renovation and clean energy alternatives in power plants. Retrofitting vehicles with diesel particulate filters and scrapping high-emission vehicles. Overhauling subway and bus infrastructure. Tightening environmental requirements for industrial and construction activities.
- **Lessons for Delhi:** Implement an efficient bus-metro integrated transport system, scrap old vehicles with subsidies, build cycling and walking lanes, and consider cross-subsidisation.
- Overhaul the energy supply system, subsidize solar rooftops, and connect them to the grid.

## Lok Sabha passes Bill to amend the Disaster Management Act of 2005

**The Hindu Bureau**  
NEW DELHI

The Lok Sabha on Thursday passed a Bill to strengthen the working of national and State disaster management authorities, with the Centre stressing that the legislation will help State governments deal with disasters better.

The House cleared the Disaster Management (Amendment) Bill, 2024 by a voice vote. Several amendments moved by the Opposition members were negated.

The new Bill seeks to bring clarity and convergence among stakeholders in the field of disaster management. THULASI KAKKAT

not only overcome them but also strengthen the disaster management system.

whole; this Bill will prepare the country to handle disasters better," he said.

Trinamool Congress alleged that the Modi government was not able to manage the pandemic properly and a large number of people died. He said, "This Bill creates a plethora of organisations and has added a number of English terms".

Captain Viriato Fernandes of the Congress said that while the members were talking about following a holistic approach to deal with disasters, the Bill seemed to have gone against that approach.

Another Congress member, G.K. Padavi, pointed

- The Lok Sabha passed a Bill to strengthen the working of national and State disaster management authorities, with the Centre stressing that the legislation will help State governments deal with disasters better.
- The House cleared the Disaster Management (Amendment) Bill, 2024 by a voice vote. Several amendments moved by the Opposition members were negated.
- Pointing out that State governments had flagged several difficulties in implementing the Disaster Management Act of 2005, Union Minister Nityanand Rai said the new Bill would not only overcome them but also strengthen the disaster management system. The Bill seeks to bring clarity and convergence among stakeholders working in the field of disaster management.

## What is Disease X and why the world should prepare for it

COVID-19 is regarded as the first instance of a real Disease X. When SARS-CoV-2 emerged as an unknown pathogen causing a global pandemic, it exemplified the scenario that Disease X was meant to represent – an unpredictable, novel threat requiring rapid global response and adaptation

C. Aravinda

### The story so far

**T**he recent outbreak reported in the first week of December 2024 in the Democratic Republic of Congo, which has claimed over 400 lives and remains unclassified, has raised concerns that it could be an instance of Disease X. This unsettling event has reignited discussions about Disease X. Disease X is not an

hosts and environments.

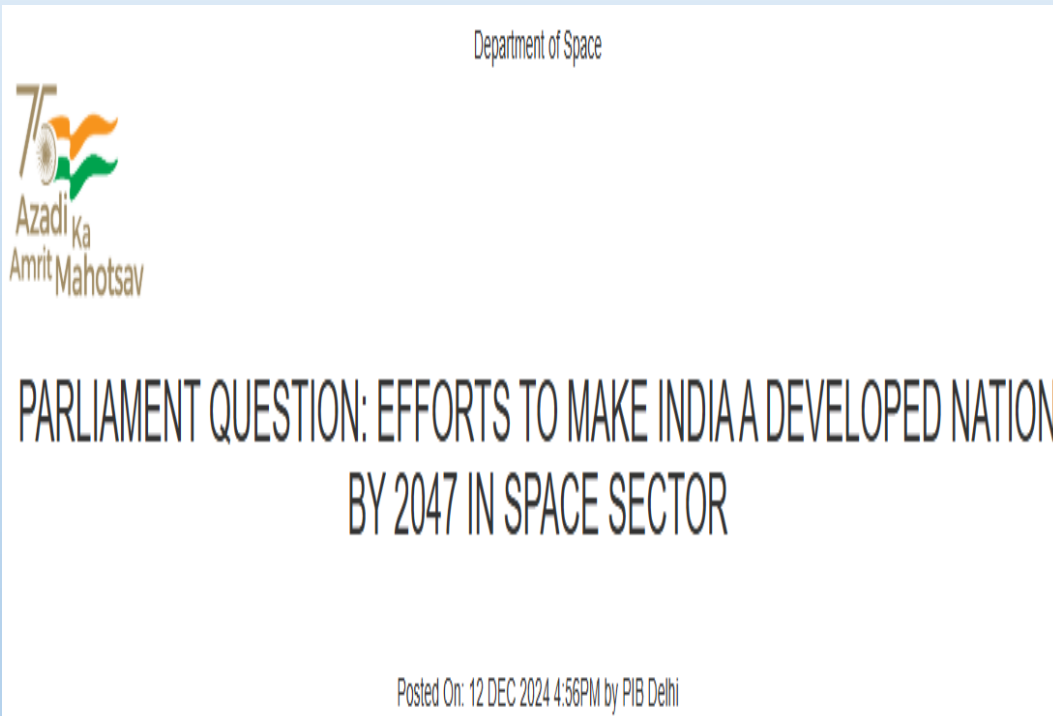

The sheer number of potential pathogens adds to the complexity. Scientists estimate that only a fraction of viruses capable of infecting humans have been identified, leaving a vast pool of unknown threats. Genomic sequencing and artificial intelligence are beginning to play an important role in narrowing this vast field of possibilities, but even with these tools, predicting the exact origin, timing, and behaviour of Disease X

- In early December 2024, an outbreak in the Democratic Republic of Congo (DRC) claimed over 400 lives, prompting concerns that it could be an instance of Disease X. Disease X, a term coined by the World Health Organization (WHO) in 2018, refers to an unknown pathogen that could trigger a global health crisis. It was conceptualized to prepare for unpredictable outbreaks that are difficult to identify or predict. This term gained significance after the emergence of COVID-19, which embodied the scenario Disease X was meant to represent. The WHO's priority list of pathogens highlights infectious diseases with epidemic or pandemic potential, including Ebola, Marburg, and Lassa fever, among others. Disease X is a placeholder for an unpredictable pathogen that may cause a future pandemic, which could be a virus, bacterium, parasite, or even a prion.
- The challenge in predicting Disease X lies in the vast number of potential pathogens, many of which remain unidentified. Human activities, such as deforestation and urbanization, increase the risk of zoonotic spillover, while climate change is reshaping disease dynamics.

India and EU aiming for a balanced, ambitious, comprehensive and mutually beneficial Free Trade Agreement: Piyush Goyal

India and EU aiming for a balanced, ambitious, comprehensive and mutually beneficial Free Trade Agreement: Piyush Goyal

India's bilateral trade in goods with the EU was USD 137.41 billion in 2023-24, making it the largest trading partner of India for goods. In addition, the bilateral trade in services, in 2023, between India and the EU was estimated at US\$ 51.45 billion. The trade agreement with the EU would help India in further expanding and diversifying its exports of goods and services while securing the value chains. India is seeking to forge balanced agreements with major world economies to increase its market share in global trade.

9th India-Thailand Defence Dialogue held in New Delhi to explore new initiatives to further strengthen bilateral defence cooperation

Posted On: 12 DEC 2024 7:39PM by PIB Delhi

- The 9th India-Thailand Defence Dialogue took place in New Delhi on December 12, 2024. The meeting was co-chaired by Joint Secretary (International Cooperation) Shri Amitabh Prasad and Thailand's Deputy Permanent Secretary for Defence Gen Tharapong Malakam.
- Both sides agreed for early establishment of Joint Working Group to effectively steer and monitor the cooperation in the areas of defence industry. Both sides also agreed to conduct Subject Matter Experts Exchange between Indian and the Thai Armed Forces to carry forward and institutionalise regular engagement in niche domains.
- The Indian co-chair highlighted the potential of domestic defence industry with capacity and capability to cooperate with the Royal Thai Armed Forces in its defence acquisition plans. Thailand appreciated the capability of Indian defence industry ecosystem and proposed exploring possibilities for co-design, co-production and co-development in the field of defence industry.
- Thailand is a maritime neighbour and a valued partner in India's 'Act East' Policy and the Indo-Pacific region.

## Romania, Bulgaria To Join EU's Schengen Area On January 1, 2025

- Romania and Bulgaria are set to fully join the European Union border-free Schengen Area on January 1, 2025. Roberta Metsola, President of the European Parliament in a post on social media congratulated the people of both countries. She added a stronger Schengen signifies a safer & more united Europe.
- Notably, the border-free Schengen Area guarantees free movement to more than 425 million European Union citizens, along with non-EU nationals living in the EU or visiting the EU. The Schengen provisions abolish checks at the EU's internal borders while providing a single set of rules for controls at the external borders applicable to those who enter the Schengen area for up to 90 days.
-
